

Steps for checking internet connectivity, before contacting Mad Mouse Technical Team:

Step One:

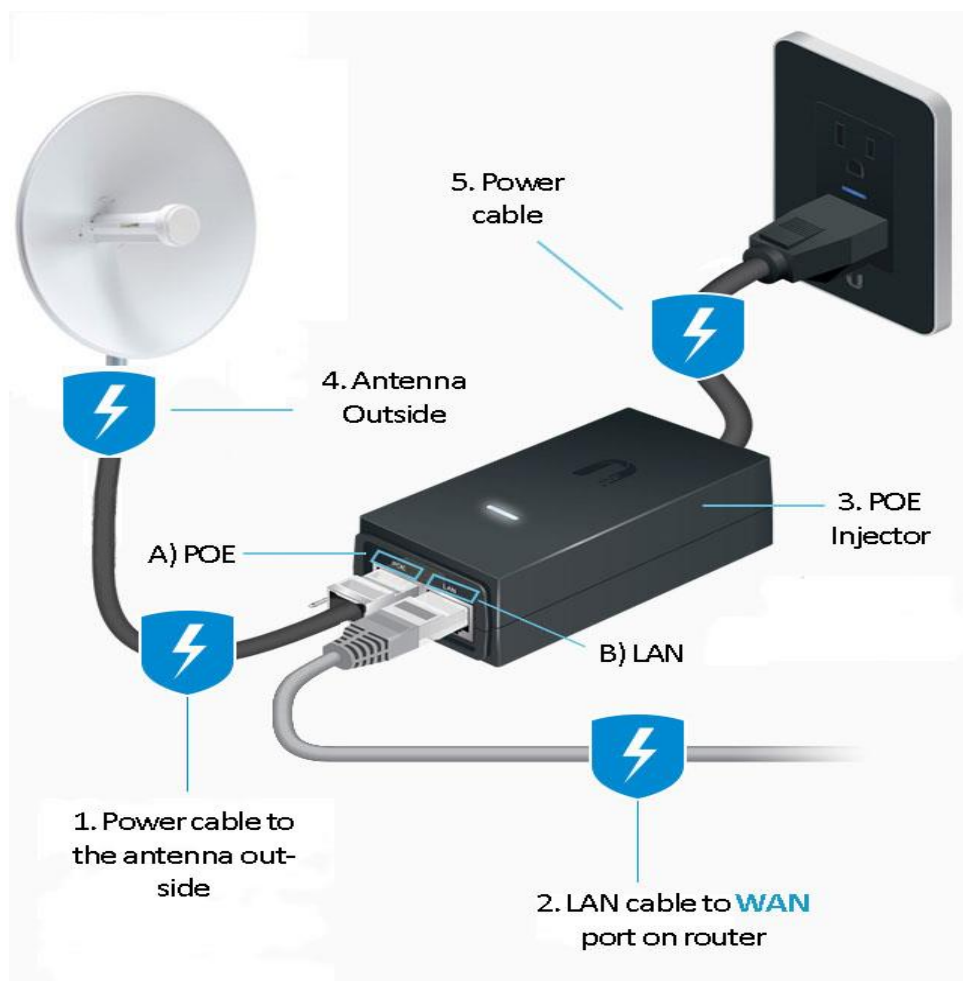

Check if your devices is connected to the Wi-Fi.

Step Two:

Check if your Router is on and the **LAN cable (2)** from your Router to the **POE injector (3)** is plugged in to the **LAN (B)** port.

Step Three:

Check if the **Power cable (1)** to the antenna outside is plugged in to the **POE (A)** port on the **POE injector (3)**

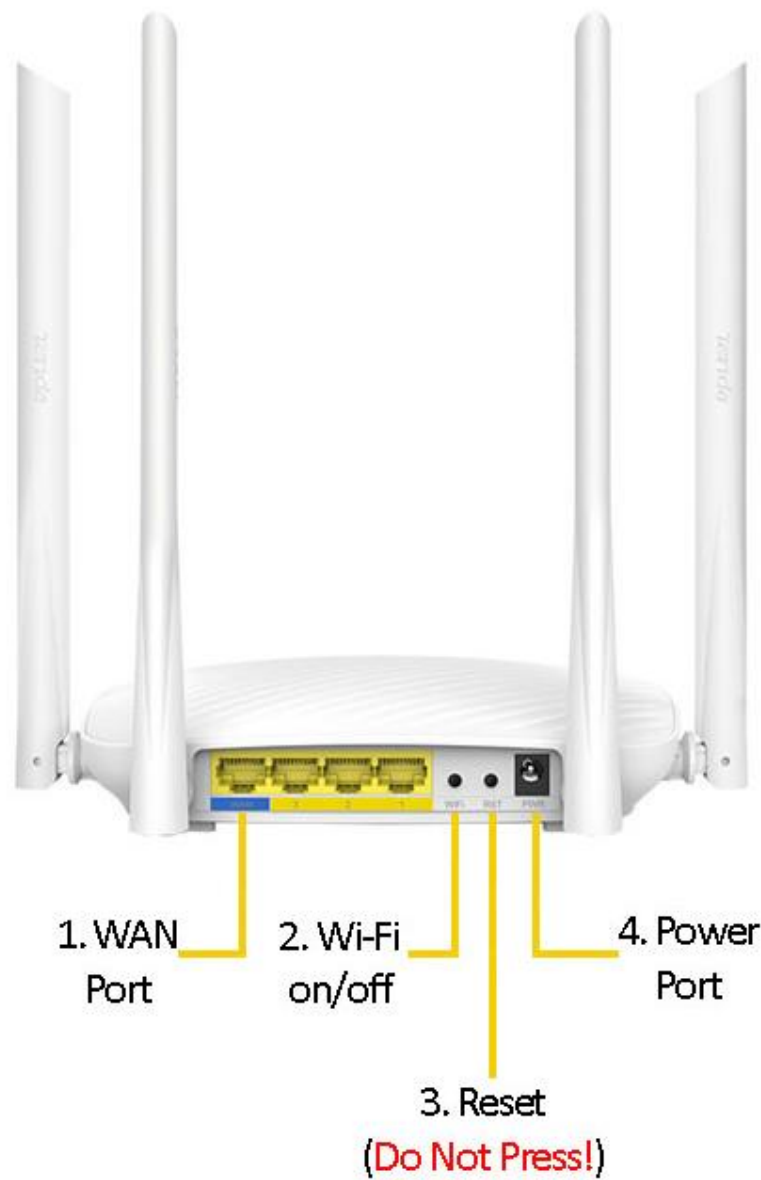

Image may differ from other makes and models, but the principle stays the same.
